HAIR CHART PHOTOSHOOT

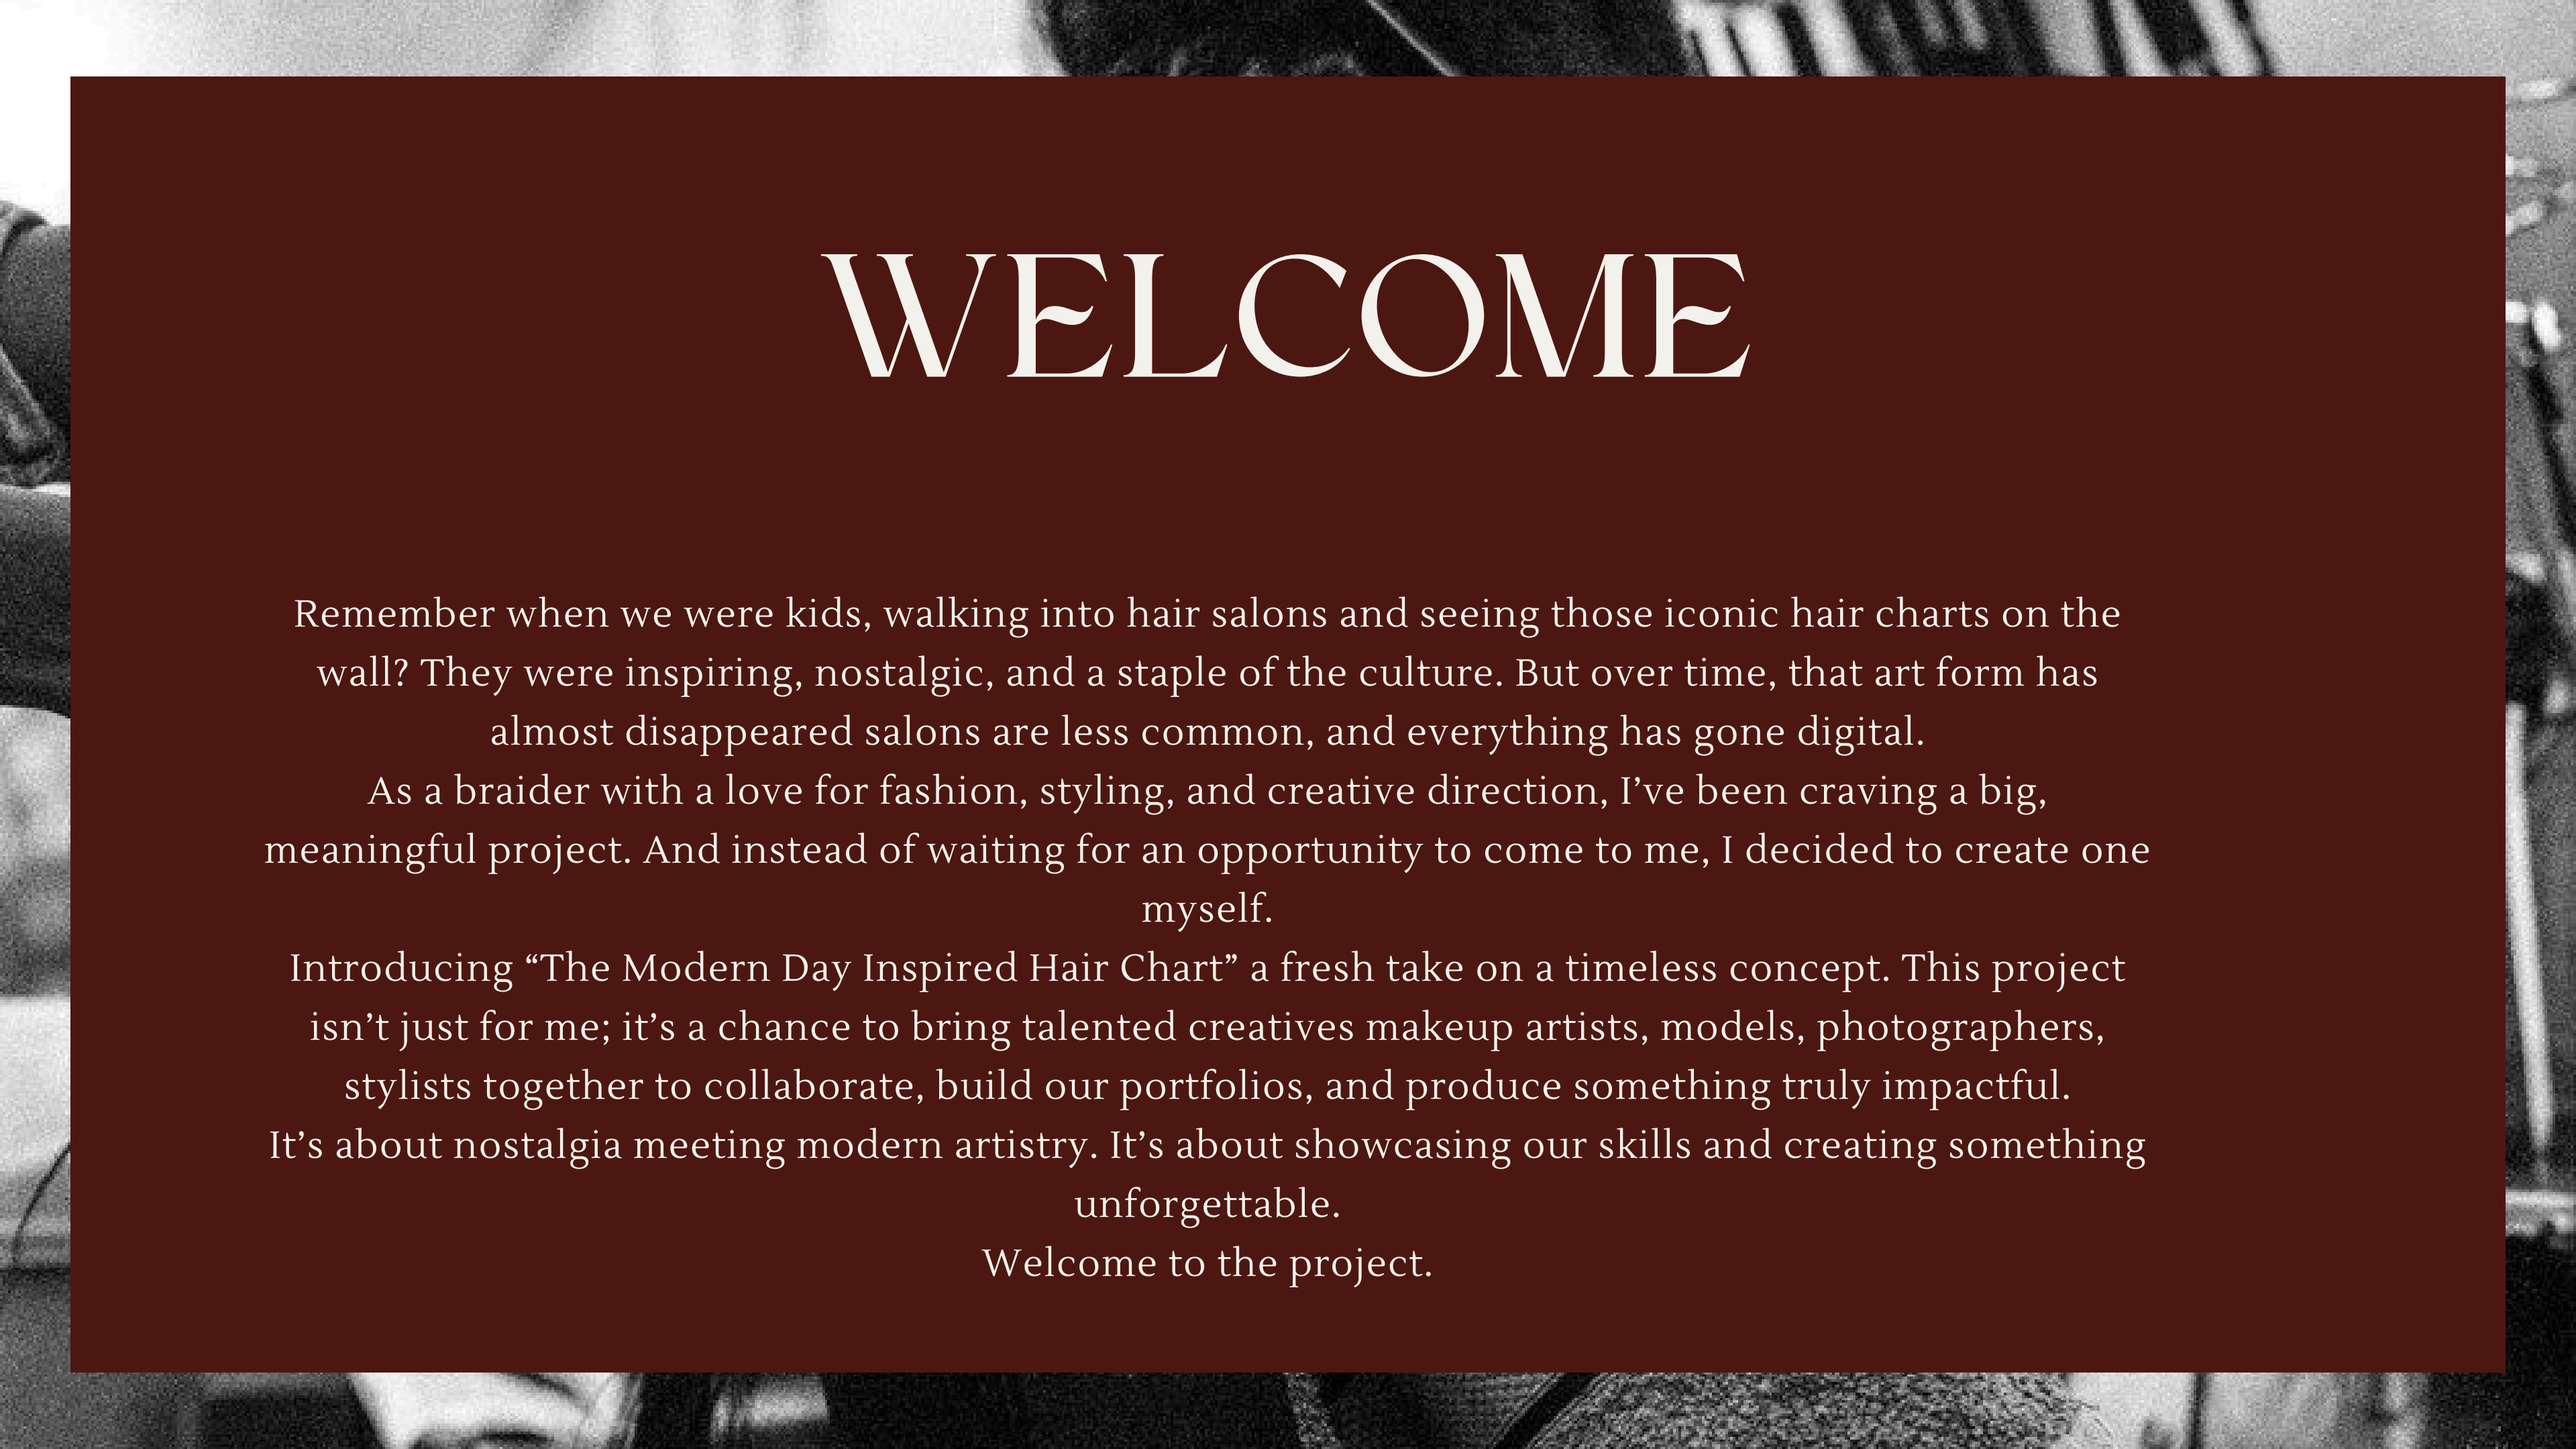

WELCOME

Remember when we were kids, walking into hair salons and seeing those iconic hair charts on the wall? They were inspiring, nostalgic, and a staple of the culture. But over time, that art form has almost disappeared salons are less common, and everything has gone digital.

As a braider with a love for fashion, styling, and creative direction, I've been craving a big, meaningful project. And instead of waiting for an opportunity to come to me, I decided to create one myself.

Introducing "The Modern Day Inspired Hair Chart" a fresh take on a timeless concept. This project isn't just for me; it's a chance to bring talented creatives makeup artists, models, photographers, stylists together to collaborate, build our portfolios, and produce something truly impactful.

It's about nostalgia meeting modern artistry. It's about showcasing our skills and creating something unforgettable.

Welcome to the project.

Thank you

Thank you for taking the time to go through this presentation. I hope I was able to help you see the vision and the story I’m trying to tell with this project. Hairstyling is a huge part of the Black community it’s one of the many outlets we use to express ourselves. It used to be the norm to see creative posters plastered in hair salons, with bold colors and unique graphic designs. But now, everything has shifted to digital, and I feel like hair posters have become a lost art. Through this project, I hope to bring that creativity back.
